Another **good** reason to enjoy gardening

Gardening is not only a pleasure, it is also a real way of life, a way of having a natural food supply, a way to exercise and soothe the soil, a way to bring beauty, and also an easy way to help protect the environment. This is why the Mantis composter is an ideal and revolutionary tool for all gardeners.

YES, revolutionary!

Because, it allows you to transform your vegetable waste (kitchen or garden) into fertilizer. Easily, quickly and without effort because you no longer need a fork to turn your compost.

In the end, the fertilizer harvested (in addition to being free!) is exceptionally rich!

As Mantis composters are tightly closed, daily rotations help distribute moisture and provide the necessary oxygen for your future fertilizer. The nutrients remain inside and do not escape into the soil.

Your garden will love it!

OUR GUARANTEE FOR YOUR PEACE OF MIND

With the **60-day MONEY BACK GUARANTEE**

We will fully refund your Mantis composter if you are not 100% satisfied.

You benefit from the **2 YEAR CONSUMER WARRANTY** for parts and labour.

Véronique BOUILLOT
Managing Director

Dear friends,

I am very happy to present to you this guide, which will surely inspire you to new ways of recycling and gardening.

You will discover how to make a natural compost and turn it into a free fertilizer, of superior quality for your garden.

Remember...

Before, to make your garden fertilizer you had to stir your compost with a fork again and again.

Now everything becomes easier: you put your plant, kitchen or garden waste in the Mantis composter and you turn the handle. In just a few weeks, your compost is ready... and all without any mess or any smell!

So please, take your time to learn more about these well rounded products, about their features and prices. I am sure you will love it.

Happy composting !

Véronique Bouillot

Without back pain!

With Mantis rotary composters, no need for a fork to turn your compost.
Grab the handle and turn.
Easy ... and very smart!

YOUR COMPOST IN 3 STEPS IT COULDN'T BE EASIER !

1 Fill

Open the door of your composter and throw in your waste of:

- ▶ **the garden:** clippings, cuts, dead leaves...
- ▶ **cooking:** peelings of vegetables and fruit, coffee grounds and filters, tea, your vegetable meal leftovers
- ▶ **non-food household:** sawdust and wood shavings, cold wood ash, paper towels, tissue paper, black and white newspapers
- ▶ **others:** horse, cow, chicken, rabbit, pork or sheep manure

Close the composter door and enjoy a cup of tea!

2 Turn

Within hours the magic begins...

Millions of oxygen consuming bacteria go to work. The greatest activity occurs in the inner core, so the secret of a fast compost is to care about this core daily. Give the handle on your CompostTumbler five turns-just once each day. This mixes and aerates your organic material to maintain the heat core (of up to 160 degrees) speed up decomposition and kill off any weed seeds.

3 Harvest and use

In as little as 14 days (in optimal conditions and more generally at the end of a few weeks, against months for other types of composters) you harvest your free compost, which will help you build soil and boost the health and productivity of all your plants and your flowers.

* a good proportion of green and brown materials, an outside temperature of over 16 °, a humidity level of about 50% in the composter and small waste!

VINCENT'S ADVICE MANTIS TECHNICAL ADVISER

For good composting, ideally, alternate layers of dry and wet waste, fine and coarse, green (high in nitrogen) and brown (high in carbon)

ROTARY MANTIS COMPOST

Choose the right model for you

ORIGINAL COMPOSTUMBLER REF. CT01001E

Large capacity and convenient

- ▶ **Capacity of 635 litres:** great volume for big gardens
- ▶ **Rotary gear mechanism:** for effortless tumbling
- ▶ **Powder-coated galvanized steel drum:** Rodent and weatherproof
- ▶ **Steel load-bearing frame:** facilitates handling by placing the drum at your height
- ▶ **Wide door:** makes loading and emptying the drum easier
- ▶ **Double side and double top venting:** promotes the circulation of air, the evacuation of excess moisture and bad smells and accelerates the decomposition process.
- ▶ **Sits 81 cm / 32" off the ground:** easy loading into a wheelbarrow

Dimensions :
Width: 127 cm / 50"
Depth: 102 cm / 40"
Height: 173 cm / 68"
Height Off ground: 81 cm / 32"
Unloaded Weight: 50 kg / 110 lbs

COMPACT COMPOSTUMBLER REF. CT02001E

The best compromise between space and efficiency

- ▶ **Capacity of 335 litres:** a perfect countenance for most gardens
- ▶ **Rotary gear mechanism:** for effortless tumbling
- ▶ **Powder-coated galvanized steel drum:** Rodent and weatherproof
- ▶ **Steel load-bearing frame:** easy handling
- ▶ **Wide door:** makes loading and emptying the drum easier
- ▶ **Double side and top venting:** promotes the circulation of air, the evacuation of excess moisture and bad smells and accelerates the decomposition process.

Dimensions :
Width: 107 cm / 42"
Depth: 84 cm / 33"
Height: 109 cm / 43"
Height Off ground: 30 cm / 12"
Unloaded Weight: 30 kg / 66 lbs

TUMBLERS ur garden

MINI COMPOSTUMBLER

REF. CT08001E

The urban portable composter

- ▶ **140 litres capacity:** ideal for composting vegetable waste in small gardens and for city dwellers.
- ▶ **Compact composter with wheels:** always at hand.
- ▶ **Groove mechanism:** for effortless tumbling.
- ▶ **High density polyethylene drum:** rodent and odour proof.
- ▶ **Double wall with 2mm insulating air layer:** for a constant temperature and efficient composting in all weather.
- ▶ **Wide pivoting door on the top:** makes loading easy.
- ▶ **Double side and top venting:** promotes the circulation of air, the evacuation of excess moisture and bad smells and accelerates the decomposition process.

Dimensions :

Width: 79 cm / 31"

Depth: 66 cm / 26"

Height: 94 cm / 37"

Height Off ground: 18 cm / 7"

Unloaded Weight: 30 kg / 66 lbs

COMPOST-TWIN

REF. 4000-00-14

The largest with 2 compost drums

- ▶ **Capacity of 700 litres:** 2 bins of 350 litres each, ideal for a large garden.
- ▶ **2 compost chambers:** fill one while the other is cooking. The perfect solution for a continuous supply of composting material.
- ▶ **Rotary gear mechanism:** for effortless tumbling.
- ▶ **Steel load-bearing frame:** facilitates handling by placing the drum at your height.
- ▶ **Wide doors:** make loading and unloading the drum easier.
- ▶ **Double ventilation on the doors and on the sides:** promotes air circulation, evacuation of excess moisture and bad smells and accelerates the decomposition process.

Dimensions :

Width: 165 cm / 65"

Depth: 104 cm / 30"

Height: 168 cm / 66"

Height Off ground: 81 cm / 32"

Unloaded Weight: 70 kg / 154 lbs

COMPOST THERMOMETER

REF. 201101

Maintain the correct temperature!

This thermometer will be an important tool for you to get quality compost quickly. Indeed, by diving in the heart of the compost to monitor the temperature (without getting dirty, thanks to its peak of 50 cm/20" long"), you can determine the stage of maturation of the compost and avoid temperatures that are too high.

At the very beginning of the process (2/3 days), the temperature can rise to 65-70 °C, which will destroy the majority of weed seeds. After several days, the microorganisms will have devoured most of the food and the temperature will slowly and steadily begin to fall.

MOISTURE METER REF. 201103

To monitor composting conditions

This 20 cm/8" long probe allows you to check the degree of humidity of your compost or the roots of plants. Easy to read, it indicates 4 levels of humidity, from very dry to very wet. This allows you to plan your watering to obtain ideal composting conditions. You can prevent overwatering, which may be particularly hazardous to potted plants and can ensure that your compost doesn't not merely rot, but actually starts "cooking".

SIFTER SCREEN

To obtain finer compost, which can be incorporated more easily into your soil, use the sieving grid. It settles in place of the composter door. Once the compost is ready, and the compost flows through, ready to be used.

For Compostumblers Original & Compact: Ref. CT00004E

For Compost-Twin: Ref.201107

THE COMPOSTUMBLER VINYL COVER

Weather-Resistant and easy to install, it is a great value for the protection of your composter!

- ▶ **Vinyl Waterproof Tarpaulin:** will protect your composter from bad weather. Ideal in winter when you do not compost.
- ▶ **Perfect Thickness and size:** for effective protection.
- ▶ **Easy to use:** unfolds and stores very easily. You can even put it under the composter when you unload the compost so you do not lose any of it.

For Compostumblers Original & Compact: Ref. CT00005

For Compost-Twin: Ref.201104

MAKE TRANSPORTATION TO THE GARDEN EASIER

LOADUMPER
MANTIS

LOADUMPER REF. 811134

The wheelbarrow that's
TRULY UNBEATABLE !

- ▶ **Unique design:** the bin is easily positioned vertically for easy loading and unloading and thus, preserving your back!
- ▶ **Capacity of 113 litres or 90kg:** suitable for all gardens and most uses.
- ▶ **Polyethylene chest:** lightweight and durable.
- ▶ **Anti-rust tubular frame:** robust to withstand bad weather and ground shocks for a long time.
- ▶ **Maintenance free wheels:** maximum stability and comfort to move on all terrains and pass over obstacles with ease.
- ▶ **Handlebar with padded grip:** a comfortable handle to avoid blisters.

They are happy with their composter

“ We already have a compact composter, and we were so pleased we wanted another one. ”

★★★★★ **EXCELLENT** – 08/08/2017.

“ Solid structure, looks good in the garden, and compost is quality. ”

★★★★★ **EXCELLENT** – 28/05/2017.

“ I have a Mantis Compost Tumbler which is so easy to use. Just put the waste materials in the drum, fasten up the cover and turn the handle the recommended 5 times each day. The rotation of the drum keeps the materials moving and the aeration vents mean no nasty odours. No heavy forking, no mess and good compost within a much shorter time than the standard static plastic composter I had previously. I'm very happy with this product and recommend it to anyone. ”
